

New 100 YD Target Backer!

A HGBC Repair/Rebuild Team got together Saturday Morning (4/8/17) and removed the Old 100 Yd Target Backer and commenced with the building of the New Backer. The Team consisted of Jerry Henderson, Vic Halverson, Jim Uthe, Rich Paris, Steve Bailey, Bruce Giddings, and John Giddings. New Steel was donated by Rich Paris, and he brought the tools needed for cutting and the welding of the new structure .

The New Target Backer structure is of a modular design and this design should make the repair of it in the future faster and easier causing the range to be closed for a shorter period of time.

A big Thank You goes to Jim Uthe for coming out with his Kubota Tractor and cleaning up the Backer Area and rebuilding the 100 yard berm. Jim also had a auguring attachment for his tractor and that made the boring of the post holes much easier.

We repurposed 1 of the old steel beams removed from the 100 yard backer and Installed it at 300 yds for the Expansion of its target Backer system.

Oh behalf of the Holton Gun and Bow Club I want to give a Big Thank You to this Team of Members who volunteer their time and tools keeping this facility in repair.

Steve Bailey
